A number of unique features are also provided for a complete HDR editing experience, such as a new comparison tool that lets you compare the result with individual input pictures, a flashing mode that shows under- or overexposed regions, and snapshots that let you quickly save multiple tone mapper configurations to later compare together.. Hydra allows you to overcome this limitation by merging a number of photos with different exposure settings and to create a natural image that is much closer to what your eyes actually see.. NEW COLOR GRADING With version 4 1, we've taken feedback into account and developed a new color grading technique for Hydra.
